

COMER SYSTEM SRL

PRODUCTION:

Hydraulic cylinders according to ISO 6020/1, ISO 6020/2, ISO 6020/3, ISO 6022, DIN 24555, pneumatic cylinders and customized cylinders.

OUR CUSTOMERS:

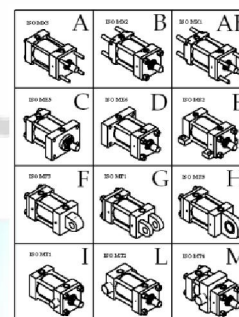

Tool machine production, special machinery providers, suppliers of machines for plastics processing, industrial plants constructors, steel plants constructors..

FEASIBLE SIZE:

Bore from 25 mm to 400 mm, stroke until 5000 mm. Mounting styles according to standard regulations.

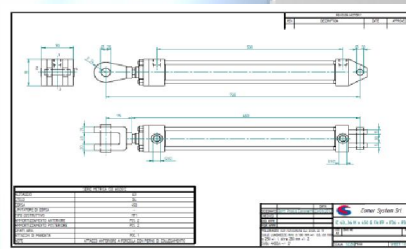

ENGINEERING:

Cylinder's engineering according to customers technical requests. Engineering involves the assembly and its parts. We help our work by making use 2D-3D software programs to simulate our products. For this, we can provide consulting services to our customers, during the engineering process, by supplying 2D-3D drawings.

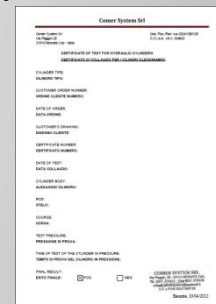

QUALITY CONTROL:

All our products are tested in accordance with current specifications and recommendations. We provide certificate of test and guarantee for cylinders. If requested, we can provide special country certificates (i.e. Russian Gost-R).

CUSTOMER ASSISTANCE:

We provide consulting service and customers assistance before and after sales.
