SUPERTEMP

Purpose:

Measuring of molten metal temperature

Scope of use:

Oxygen converters, electric arc furnace, induction furnace, blast furnace, foundry ladle

Measuring range

from 300°C to 2020°C

Precision:

0 + 3°C by 1554°C

Measuring time:

≈4 sec

Tube length:

from 100 to 1800mm (optional another length possible)

Dross cover:

Steel, without cover, copper, aluminum

Splash protection:

Sand, fire resistant fiber

NSC (nominal static characteristic) type:

B, S, K, R
